DESIGN GUIDE

Curated Fabrics Collection

How the book is built: format, folds, grid, swatches, covers, colour, type, photography and print - measured, not eyeballed.

20 collections · 19 mood-boards · 4-ring master binder 11 × 13 in · leaves 9 × 12 in

01 · AT A GLANCE

One book, twenty mood-boards

A 4-ring master binder holds one fold-out mood-board leaf per collection, as in the reference binder. Each board opens on a hero swatch of the main fabric and a measured grid of every curated shade. The front of each board carries a photo and the collection name - and no company branding anywhere.

20
collections from the book list

19
boards (Eeco Dimout + Double Shade share one)

12
inside layouts confirmed from the notes

5
draft layouts (count from price list / catalogue)

2
leaves waiting on shade lists (covers ready)

4.8 cm
leaf stack (350 GSM card + fabric)

Design principles

- **No branding.** No logo, company name or contact on any leaf or the binder.
- **Mood-board per collection.** Photo + name outside; hero swatch, specs and shade grid inside.
- **Ordered by light control.** Sheer → Curtain → Texture Dimout → Dimout → Blackout → Lining, then by weight (GSM).
- **Measured layout.** Every grid is solved for the largest legible swatch; one grid per board.
- **Traceable.** Each swatch slot has an ID (A01, B07 …) that matches the Shade Register in the Excel.
- **Print-true.** CMYK PDFs with bleed, turn-ins, fold ticks, TrimBox and BleedBox.

02 · SEQUENCE

Sheer to blackout - the order is the logic

Customers decide on light first, texture second. The book follows that decision: it opens airy and closes room-darkening. Inside each level, lighter fabrics (lower GSM) come first; unknown weights follow, alphabetically.

SHEER
Filters light, keeps the view

01 Breeze
02 Linen Sheer

CURTAIN
Soft daylight, decorative main fabric

03 Neo Soft
04 Sereno
05 Glory Cotton
06 Virinche
07 Aria

TEXTURE DIMOUT
Textured face, strong light reduction

08 Lexus Texture
09 Noble Texture
10 Texture Coated
11 Texture Dimout

DIMOUT
Room-darkening, plain or textured

12 Eeco Dimout
13 Double Shade
14 Lord Dimout
15 Glorious Dimout
16 Paris Dimout
17 Premium Dimouts

BLACKOUT
Blocks light fully

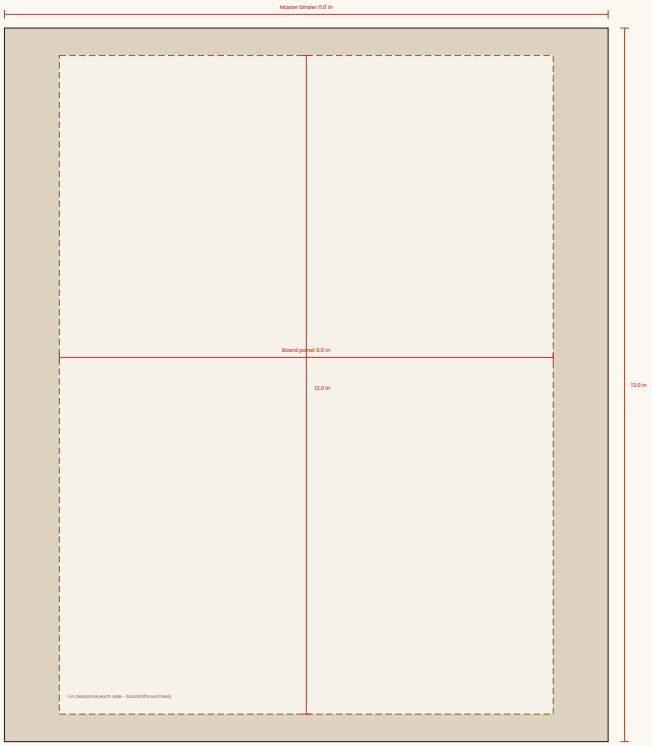

18 Neo Crest
19 Neo Luna

LINING
Backing for drape & fall

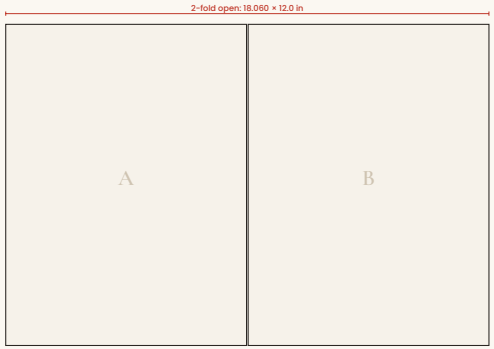

20 Ritz Satin

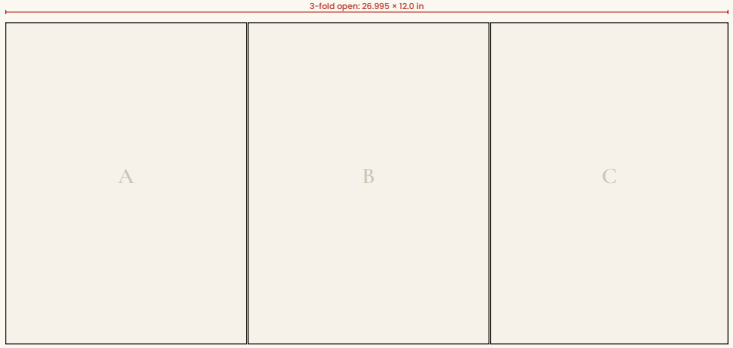

> Colour code: each level has one colour. It appears as the index tab on the board edge, the light-control scale on covers and liners, and the key on the binder back - so a collection can be found without leafing through.

Sizes, to scale

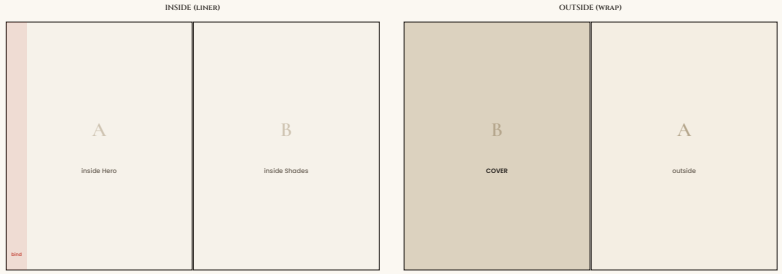

From the notes: cover 11 × 13 in, inside boards 9 × 12 in. Leaves fold to 9 × 12 and hang on 4 rings, with 1 in clearance all round.

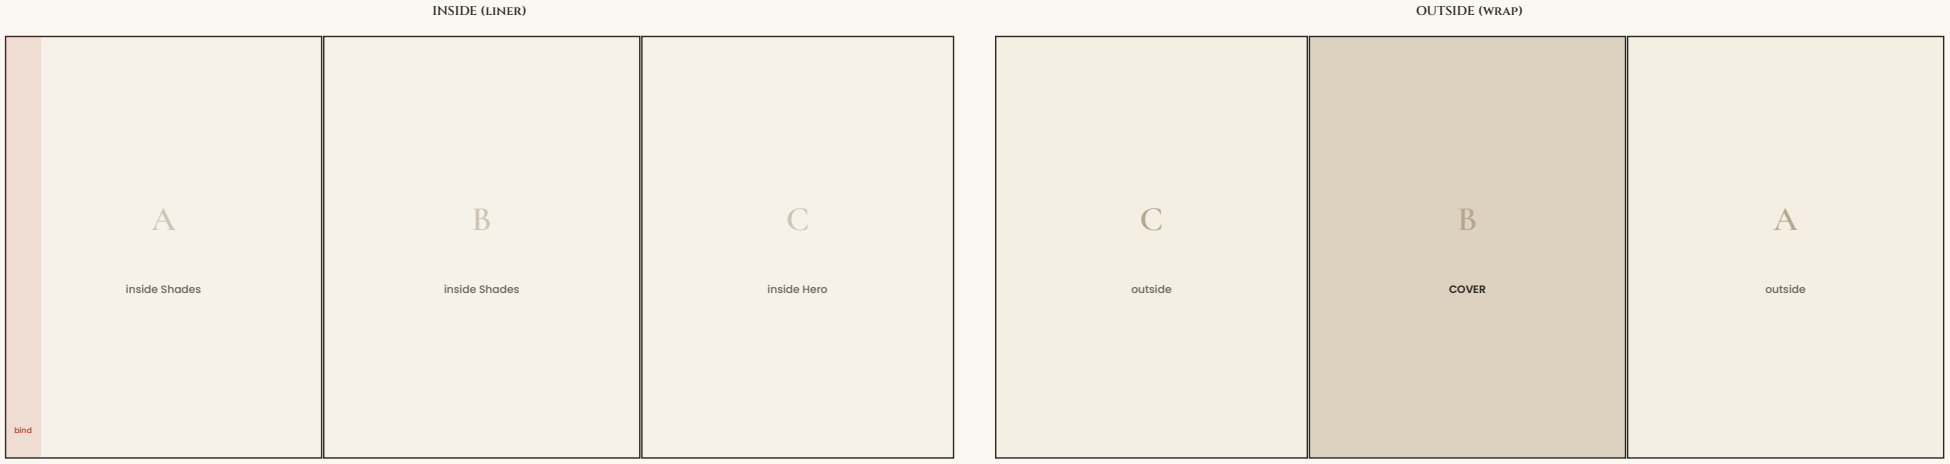

Item	Size	Why
Fold allowance	0.06 in double score	Room for two fabric layers when a leaf closes
3-fold panel C	8.875 in	Folds inside B; 3 mm narrower avoids buckling
Binder	65 mm 4-D-ring · spine 3.228 in	Stack 48 mm = Σ folds × (0.45 mm card + 0.5 mm fabric); ring = smallest size with 25% headroom

Which panel does what

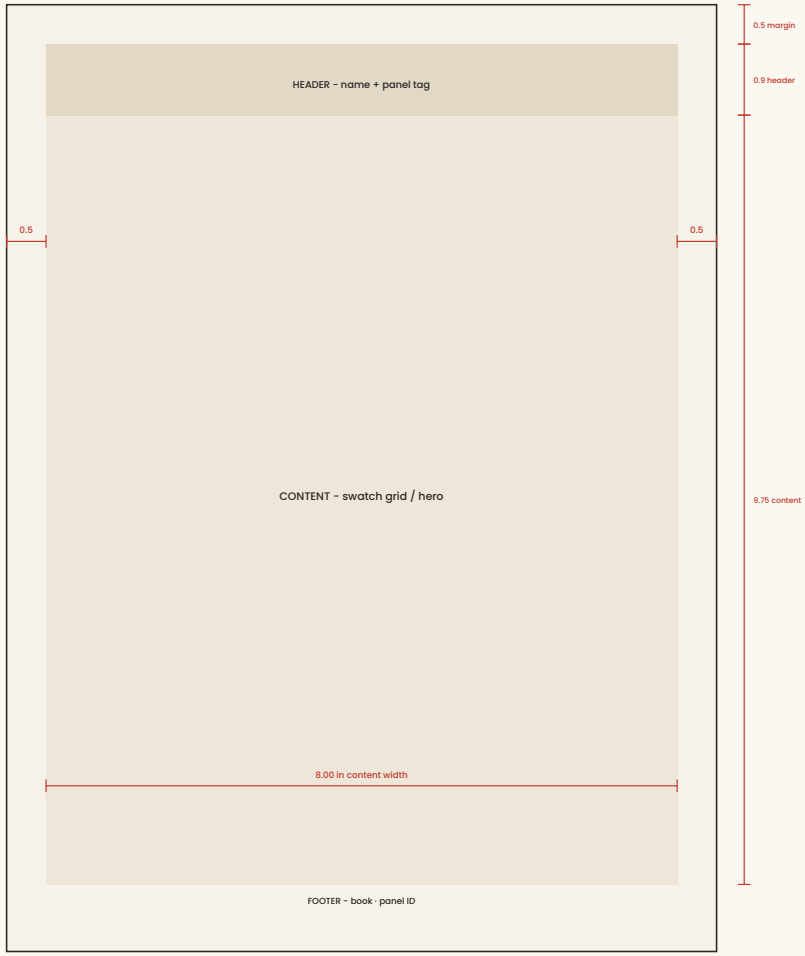

2-fold: inside A = hero main fabric + specs, B = shade grid. B folds onto A; the outside of B is the cover.

3-fold (roll fold): inside A + B = shade grid, C = hero (as in the reference trifold). C folds in first, then B over A; the outside of B is the cover.

Binding edge: 1 in on panel A is kept clear for the 4-ring punch, as in the reference binder. Index tab prints on the hinge edge of the cover.

Panel grid and margins

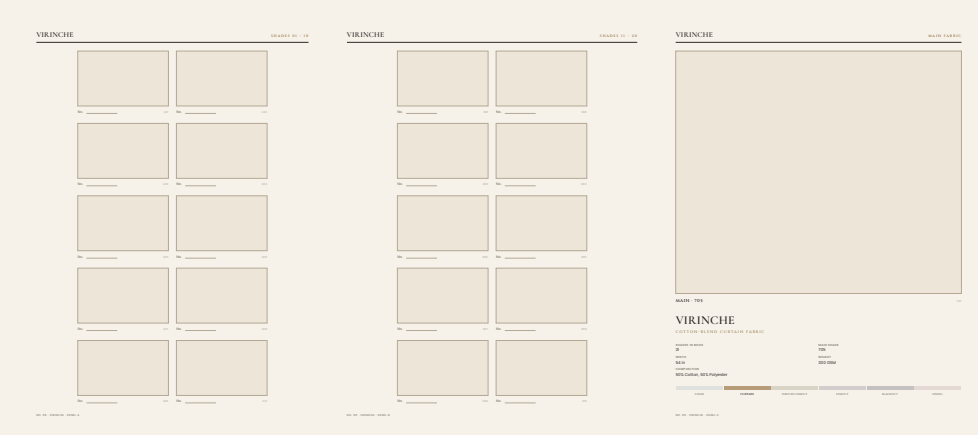

Zone	Value	Rule
Panel	9.0 × 12.0 in	From the notes
Outer margin	0.5 in	Safe zone - nothing printed outside except background
Binding margin (panel A)	1.0 in	Clear for punching / screw-post
Header	0.9 in	Book name (Cormorant 15 pt) + panel tag (Cinzel 7 pt) + hairline
Footer	0.35 in	Book No. · name · panel letter (Poppins 5.5 pt)
Gutter	0.22 in	Between swatches - enough for pinked edges
Label band	0.26 in	Shade No. left, slot ID right
Minimum swatch	1.6 × 0.95 in	Smallest size where weave & colour still read
Maximum per panel	18	3 × 6 grid at minimum size; decides 2- vs 3-fold

> Fold rule when the notes don't give one: panels = 1 (hero, if a main is named) + ⌈other shades ÷ 18⌉, minimum 2.

Main big, cuttings small - unless the designs differ

Colour range → main fabric big

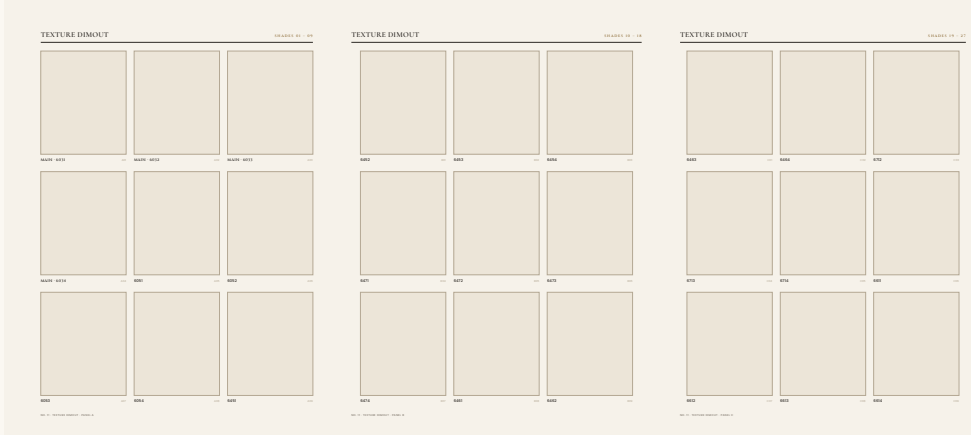

One design / texture offered in many colours: the main fabric gets a full panel so the hand and texture can be felt; every other shade is a small cutting (max 2.5 × 1.6 in) - the eye compares colour, not texture.

Example: Virinche - main 705 big, 20 colour cuttings.

Different designs → all the same size

When every fabric is a different design or texture, no swatch is "main": all are cut to one larger, near-square size so each texture reads equally. Mains, if named, go first and are marked MAIN.

Example: Texture Dimout - 27 qualities, all equal.

Same-size books: Breeze, Linen Sheer, Sereno, Texture Dimout, Neo Luna. All others: colour range. Mode is a column in the Excel Book_List - change it and re-run to switch a book.

Swatch sizes are solved, not guessed

For every panel the layout engine tries 1-6 columns and keeps the grid with the largest swatch area, biased to a 1.6 : 1 landscape swatch for colour cuttings (1.15 : 1 for mixed designs), never below the minimum size. All swatch panels on one board share the same grid so the board looks even.

Swatch rules

- Cut each swatch **1 mm larger** than its printed frame, pinked edge (zig-zag) as in the reference cards.
- Glue inside the frame; the shade No. prints under the swatch, slot ID at right in grey.
- Within a panel, order light → dark, grouped by hue family (neutrals first). Where the notes give an order, keep it.
- Colour-range books: hero = main fabric (big); other shades small cuttings ≤ 2.5 × 1.6 in.
- Mixed-design books: one equal size for every swatch, biased near-square (1.15 : 1).

Bd	Book	Pnl	Content	Qty	Grid	Swatch in
01	Breeze	A	Shades	16	4 × 4	1.71 × 2.01
01	Breeze	B	Shades	16	4 × 4	1.71 × 2.01
03	Neo Soft	A	Hero	1	1 × 1	7.50 × 6.68
03	Neo Soft	B	Shades	6	2 × 3	2.50 × 1.60

Front covering - photo and name only

#	Element	Spec
1	Book number	Cinzel 9 pt, tracked 0.3 em - position in the master book
2	Collection name	Cormorant SemiBold caps, auto-fitted to the column, max 46 pt; long names break by word
3	Category line	Cinzel 10.5 pt between double rules (as on the Neo Luna sample)
4	Arch photo window	4.11 × 9.65 in, cream frame 0.13 in. Lifestyle photo; vector curtain illustration (final), or a lifestyle photo if supplied
5	Facts	Shade count, width, GSM - only values from the notes / price list
6	Light-control scale	6 steps, this book's level filled
7	Index tab	0.2 in strip in the level colour on the hinge edge, book No. in white

> No logo, company name, phone, address or website - by design. Metal corner protectors and a rope handle can be added as in the Neo Luna sample.

Inside (side 2) - the mood-board

1 Header name · 2 Panel tag (shade range / group / main) · 3 Swatch frame = glue guide

4 Shade No. (blank line until confirmed) · 5 Slot ID → Shade Register · 6 Hero main swatch(es)

7 Spec block - only known values · 8 Light-control scale with the book's level highlighted

Final book front - Trending Curated Fabrics Collection

Back (index of all 20 by light control) · spine 3.228 in (65 mm 4-D-ring for a 48 mm leaf stack) · front. Dashed lines = joints, 0.3 in each. Title wording from the brief: "most demanding / trending curated fabrics collection".

Cover art: illustration now, photo optional

Spec	Value
Window	Arch 4.11 × 9.65 in (board cover) · 5.1 × 6.95 in (master front)
Minimum size	1231 × 2895 px (300 dpi) · master 1530 × 2085 px
Orientation	Portrait, ~1 : 2.3; subject centred - the arch crops the top corners
File	JPG, sRGB, saved as assets/photos/<book-id>.jpg (e.g. virinche.jpg); master.jpg for the binder front
Content	The collection's main shade as a full-height curtain in a calm room, daylight from the side

Do

- Real fabric of that collection, main shade
- Soft side light, neutral walls, wooden or stone floor
- Same camera height and white balance for all 20

Don't

- No logos, text, watermarks or supplier branding in the photo
- No stock image you have no licence for
- No heavy filters - colour must match the swatch

No.	Book	File name	Photo

20	Ritz Satin	ritz-satin.jpg	Optional

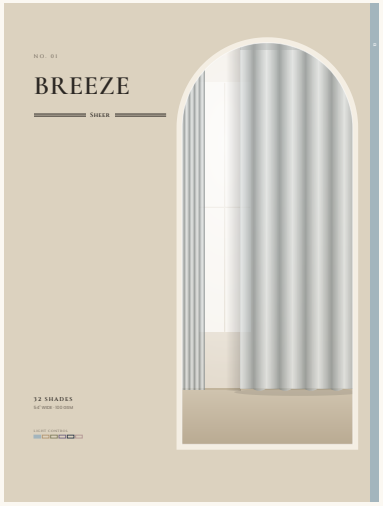

Production specification

Item	Specification
Files	CMYK PDF, fonts embedded, TrimBox + BleedBox set, crop marks, fold ticks, slug
Leaves	350 GSM card, printed both sides: side 1 outside (cover + spec), side 2 inside (swatch layout); turn on the long edge. Matt laminate, double-scored folds (0.06 in); 3-fold panel C 8.875 in wide
Punching	4 holes in the 1 in binding zone of panel A, matched to the binder mechanism
Master binder	65 mm 4-D-ring binder, 2.5 mm boards, cover wrap 00_Master_Binder_Cover (0.625 in turn-in)
Rigid option	Stand-alone boards (like the Neo Luna hanger) at 1.5 mm greyboard would make a 10 cm stack - too thick for rings; use card leaves in the binder
Fittings	Black metal corner protectors (as Neo Luna sample), optional rope handle
Colour	Hard proof one board before the run; match linen and ladder colours to proof

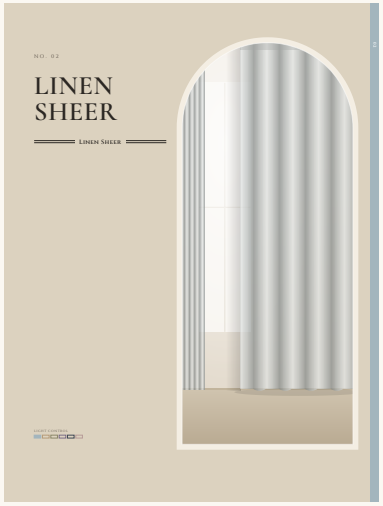

QC checklist

- No branding anywhere (logo, name, phone, address, website)
- Board sequence 01-20 matches the binder back index
- Every swatch sits inside its frame; shade No. matches the fabric
- Slot IDs match the Shade Register; blank lines filled or labelled
- Cover art approved - illustrated curtain or supplied photo
- Boards close flat; panel C folds inside without buckling
- Index tabs visible on the hinge edge, colours correct per level
- Binder closes with all 19 leaves; rings turn freely
